# Artificial Intelligence, MS (Portland)

The Master of Science in Artificial Intelligence program is designed to give students a comprehensive framework for AI with specialization in one of five areas: vision, intelligent interaction, robotics and agent-based systems, machine learning, and knowledge management and reasoning. Students may choose from three options: specialization, thesis, or coursework only. Students will engage in an extensive core intended to develop depth in all core concepts that build a foundation for AI theory and practice. Students will also be given the opportunity to build on the core knowledge of AI by taking a variety of elective courses, selected from colleges throughout campus, to explore key contextual areas or more complex technical applications. Program graduates will be well positioned to attain research and development positions in a rapidly growing field or to progress into doctoral-degree-related fields.

The Master of Science in Artificial Intelligence is comprised of eight courses: five core courses, two electives to be chosen from one of five specialization areas or coursework option, and one elective. The core courses are designed and developed by Khoury College faculty. Elective courses consist of graduate courses offered in Khoury and other partner colleges, including College of Arts, Media and Design; College of Engineering; College of Science; and College of Social Sciences and Humanities.

#### **Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

#### **Core Requirements**

A cumulative GPA of 3.000 or higher is required in the following core courses:

| Code                       | Title  | Hours |
|----------------------------|--|-------|
| Intelligence               |  |       |
| CS 5100                    | Foundations of Artificial Intelligence                 | 4     |
| Programming and Algorithms |  |       |
| CS 5010                    | Programming Design Paradigm                            | 4     |
| CS 5800                    | Algorithms   | 4     |
| Machine Learning           |  |       |
| CS 6140                    | Machine Learning                                       | 4     |
| Interaction                |  |       |
| CS 5170                    | Artificial Intelligence for Human-Computer Interaction | 4     |

#### **Options**

Complete one of the following options:

#### **SPECIALIZATION OPTION**

| Code                                       | Title   | Hours |
|--|---|-------|
| Complete two courses from one of the follo | wing specializations:                                 | 8     |
| Vision                                     |   |       |
| CS 5330                                    | Pattern Recognition and Computer Vision               |       |
| CS 7180                                    | Special Topics in Artificial Intelligence             |       |
| EECE 5639                                  | Computer Vision                                       |       |
| EECE 7370                                  | Advanced Computer Vision                              |       |
| Intelligent Interaction                    |   |       |
| CS 5150                                    | Game Artificial Intelligence                          |       |
| CS 5340                                    | Computer/Human Interaction                            |       |
| CS 7340                                    | Theory and Methods in Human Computer Interaction      |       |
| Robotics and Agent-Based Systems           |   |       |
| CS 5180                                    | Reinforcement Learning and Sequential Decision Making |       |
| CS 5335                                    | Robotic Science and Systems                           |       |
| EECE 5550                                  | Mobile Robotics                                       |       |
| EECE 5554                                  | Robotics Sensing and Navigation                       |       |
| Machine Learning                           |   |       |
| CS 5180                                    | Reinforcement Learning and Sequential Decision Making |       |
| CS 6220                                    | Data Mining Techniques                                |       |
| CS 7140                                    | Advanced Machine Learning                             |       |

### 2 Artificial Intelligence, MS (Portland)

| or EECE 7397  | Advanced Machine Learning   |   |
|---|---|---|
| CS 7150   | Deep Learning   |   |
| DS 5230   | Unsupervised Machine Learning and Data Mining                                       |   |
| EECE 5612   | Statistical Inference: An Introduction for Engineers and Data Analysts              |   |
| EECE 5644   | Introduction to Machine Learning and Pattern Recognition                            |   |
| MATH 7340   | Statistics for Bioinformatics   |   |
| Knowledge Management and Reasoning  |   |   |
| CS 6120   | Natural Language Processing   |   |
| CS 6200   | Information Retrieval   |   |
| CS 6220   | Data Mining Techniques  |   |
| CS 7290   | Special Topics in Data Science  |   |
| Complete one course from the electives list the student's selected specialization area. | below or an additional course chosen from the specialization area above, outside of | 4 |

### **COURSEWORK OPTION**

| Code                                      | Title   | Hours |
|---|---|-------|
| Complete 12 semester hours from the elec- | tives or specialization course lists. Students can take up to one course from any | 12    |
| Khoury College 5000-6000-level course.    |   |       |

#### **THESIS OPTION**

| Code                                     | Title                               | Hours |
|--|-------------------------------------|-------|
| CS 7990                                  | Thesis                              | 4     |
| CS 8674                                  | Master's Project                    | 4     |
| Complete 4 semester hours from the elect | ves or specialization course lists. | 4     |

## **Electives List**

| Code      | Title                                     | Hours |
|-----------|---|-------|
| CS 7180   | Special Topics in Artificial Intelligence |       |
| CS 8674   | Master's Project                          |       |
| EECE 7337 | Information Theory                        |       |
| GSND 5110 | Game Design and Analysis                  |       |
| PHIL 5010 | Al Ethics                                 |       |
