

Cannabis Science, Graduate Certificate (Boston)

The Graduate Certificate in Cannabis Science offers coursework in cannabis history, business, and law/policy with a primary focus on the chemical/biochemical, pharmacological, scientific, and health/therapeutic aspects of cannabis. This program is designed for students with a strong science background who want to explore the cannabis industry. It provides the knowledge needed to advance careers in healthcare, public policy, or health law, while supporting policy development and public health initiatives. Students have an opportunity to gain a comprehensive understanding of cannabis analysis and applications, the human endocannabinoid system, and the medicinal and clinical implications of cannabis.
