

Agile Project Management, Graduate Certificate (Online)

Northeastern University's Graduate Certificate in Agile Project Management is designed to empower students to explore agile principles and practices and remain up-to-date with current trends in the agile framework. The increasingly important role of agile practitioners and managers is becoming clear as agile business development processes are being adopted by major companies because of its high degree of success in achieving improved time to market, reducing costs, and increasing overall customer satisfaction.

The program in agile project management is led by highly credentialed faculty members that are agile practitioners with decades of experience in helping companies successfully implement agile in their organizations.

Through online courses, our agile project management curriculum offers students an opportunity to develop a strong framework and understanding of the role of agile management, an understanding of how an agile approach to managing projects can deliver value to the organization, a personal leadership strategy for success as an agile practitioner, and an agile evaluation plan to measure success.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
PJM 6100	Foundations of Project Management ¹	3
PJM 6760	Principles of Agile Product Delivery and Project Management	3
PJM 6770	Advanced Agile Product Delivery and Project Management	3
PJM 6780	Agile Implementation and Governance	3
PJM 6790	Agile Delivery for Sustainable and Resilient Organizations	3

¹ In rare cases and at the program's discretion, students may request a course substitution or transfer credit for Foundations of Project Management (PJM 6100). A student may qualify for the course substitution if they have at least three years of direct project management experience; the student may complete any other PJM elective (as long as they have met the prerequisites) to meet minimum required coursework hours for this certificate. A student may qualify for transfer credit if they hold their Project Management Professional certification.

Program Credit/GPA Requirements

15 total semester hours required

Minimum 3.000 GPA required
