

Information Security Management, Graduate Certificate (Online)

The Graduate Certificate in Information Security Management is designed to provide a conceptual and practical overview of information security management. It begins with an overview of key information security management issues and principles. It presents security governance challenges, including the policy, law, regulatory, and ethical accountability frameworks that information security risk managers must work within. The certificate includes review courses that prepare students for the Certified Information Systems Security Professional (CISSP) and Certified Information Systems Auditor (CISA) exams.
