

Project Business Analysis, Graduate Certificate (Online)

At the heart of every project is requirements analysis. It's a critical skill set leveraged across the spectrum of project work. The Graduate Certificate in Project Business Analysis provides students with a solid framework and understanding of developing requirements. It also emphasizes the need to engage stakeholders throughout the process to ensure outcomes meet the desired needs of the organization.

This graduate certificate allows students to possess an in-demand skill set and prepares them with the knowledge, skills, and tools needed to create and manage requirements to meet stakeholder needs effectively.
