

Learning, MEd (Online)

The Master of Education in Learning program is designed to prepare students as educators, facilitators, designers, and curriculum developers in learning enterprises across various organizations including, but not limited to, higher education, K-12, and other workplaces with developed learning functions. While the specific context varies across these fields, there are core skills and roles required within the learning sector including the science of learning; diversity, equity, and inclusion within the learning environment; and analysis and application of field- and profession-specific research literature. With an emphasis on experiential learning, the program offers dynamic opportunities for learners with varying degrees of work experience to practice their knowledge globally and collaboratively while implementing seminal and emerging learning-related concepts in real-life and complex projects.
