

Video News Storytelling, Minor

Video is emerging as the preeminent form of storytelling in all aspects of journalism. Television news brought video into people's homes decades ago, but the digital revolution has transformed journalists and even the public at large into video storytellers. They are now delivering news and information using video to inform, enlighten, engage, and entertain audiences on multiple platforms, including social media. This minor provides both the foundation and the essential fundamentals for students of all majors who want to tell stories and communicate effectively through the use of video.

Minor Requirements
