

Creative Writing, Minor

The creative writing minor bridges the craft of creative writing with themes crucial to our future. Students hone their skills in a variety of genres with courses that explore creative writing for social equity and community resilience, expressing and celebrating identity, and writing for the commercial market. In workshop settings, students read as writers and apply editing and revision strategies to refine their own work and the work of others. They have an opportunity to learn to ethically and thoughtfully integrate frontier technologies into their creative writing practice, allowing them to merge the power of generative artificial intelligence with human insight, imagination, and inspiration.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Students complete two creative writing foundation courses and two creative writing electives from the list below. The creative writing minor is not open to students pursuing the writing minor.
