

Human Services and Psychology, BS (Boston)

Overview

Students pursuing a combined degree in human services and psychology integrate the theoretical frameworks and skills relevant to both of these areas of study. This degree curriculum focuses on clinical and policy interventions that promote wellness on the individual and community levels. Situated in a social justice framework, this curriculum emphasizes how structural forces impact psychological and social well-being, barriers to treatment, and inequities in mental health outcomes. Through courses, service-learning, co-op, and research experience, students synthesize theoretical knowledge with practical skills used when working with individuals across the life span and in multiple settings.
